Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Applicant's election of Group I in Paper No. 5 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. Claims 9, 14, 18, 19 and 24-26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 5.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hosel - U.S. Patent # 5,050,271.

As to claims 6-8, Hosel discloses a textile machine with a rotary part with an operable and closable cover in which access is prevented to the rotary part in a closed position of a lock and including a "standstill" monitor for sensing rotation and standstill of the rotary part in which the standstill monitor is connected to the lock and controlling its open/closed positions and the standstill monitor includes a stationary sensor for controlling the locking and unlocking and a rotary sensor for sensing rotation of the rotary part as a "check" or "test" as described in col. 2, lines 36 et seq and illustrated in Fig. 6 and logic table of Fig. 5. However, it is not indicated

Art Unit: 2856

when the cover/door is opened i.e. "Until the zero speed indicator is repaired or replaced". However, it seems obvious that a repair or replacement of the sensor would be required to prevent injury. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to have specified preventing unlocking until repair or replacement of the faulty sensor to prevent any future injury. As to claims 7 and 8, it would appear that as the door remains locked and machine operation is not indicated as stopped, "production" would continue.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 6-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 6, it seems that the machine is not actually "reaching zero speed" but a component of the machine. On line 3, --of-- should probably be inserted after "accuracy". In claim 7, on line 1 "the step of maintaining" lacks antecedent basis. Also, on line 3, what does "production" refer to? In claim 8, on line 1, "the step of indicating" lacks antecedent basis. Also, what does "a given guard closure" refer to?

7. Any inquiry concerning this communication should be directed to N. Fayyaz at telephone number 305-4891.
